

# Test Docker-based infrastructure as code

Ilya Beda  
CTO [beda.software](https://beda.software)

# Who am I?

- beda.software CTO and founder
- 9 years of business software development experience
- A big fan of functional programming.
- Multiple IT conferences speaker.

Why do we need infrastructure testing?

# Why do we need infrastructure testing?

1. Unit tests uses mocks

# Why do we need infrastructure testing?

1. Unit tests uses mocks
2. Unit tests can't check that app parts connected in a right way

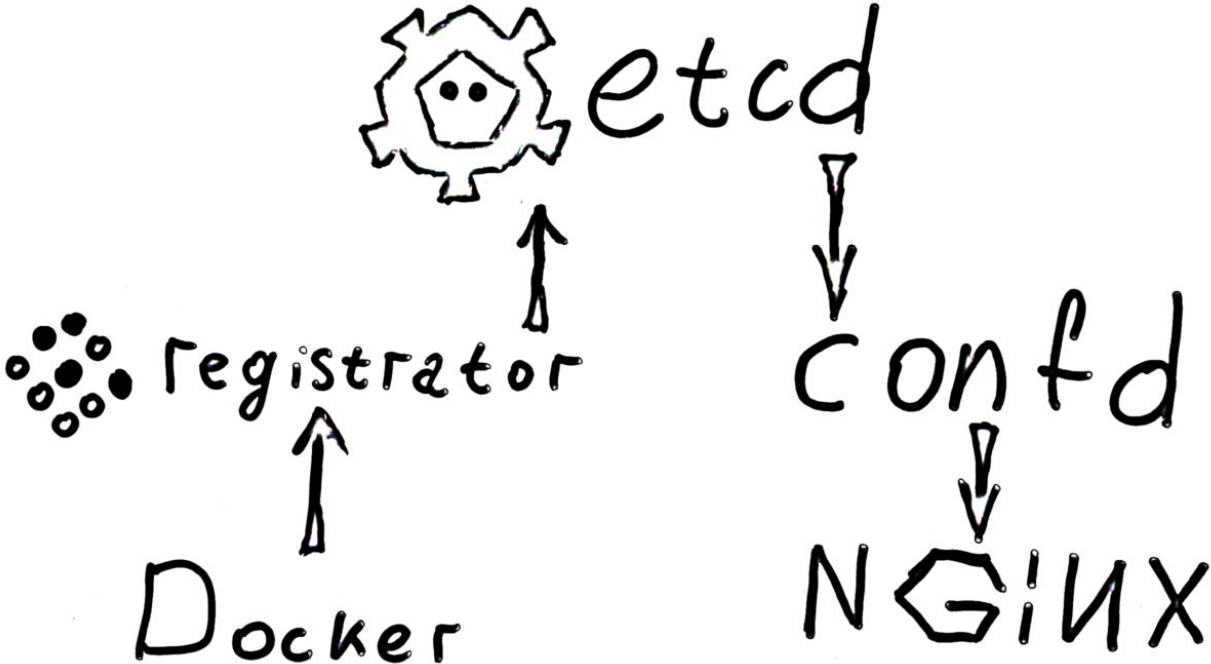

# Demo app

<https://github.com/beda-software/balancer>

# Balancer

Demo time
